

PROJECT DOCUMENTATION

Project Title	Automated Network Request Management in ServiceNow
Student	Jeelaga Ranjith Kumar
Project Type	Individual / Solo Project
Platform	ServiceNow Personal Developer Instance (PDI)
Document Date	30 July 2026

This document records the table, automation, policy, and catalog configuration used to manage Network Requests through the ServiceNow Service Catalog and Flow Designer implementation.

1. Custom Table Configuration

Activity 1: Creation of Table

The foundation for the solution is the Network Database custom table. The following figures show the initial table creation and its basic configuration.

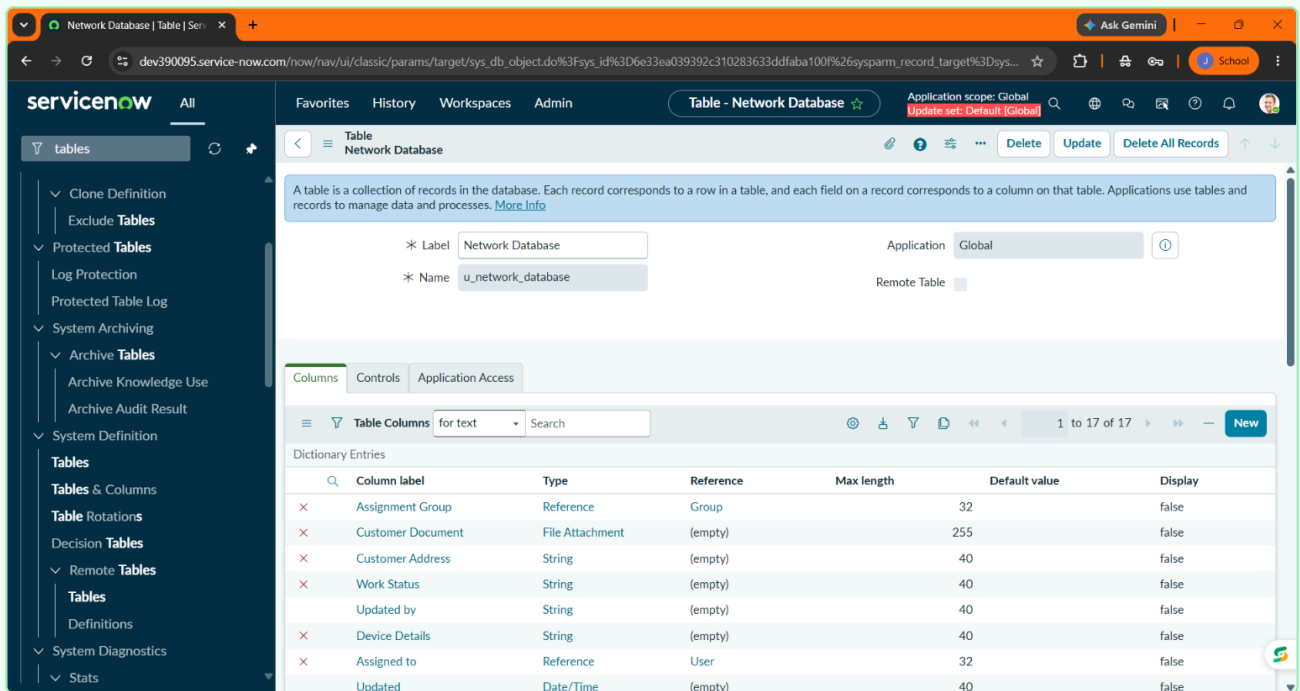

Figure 1. Network Database custom table.

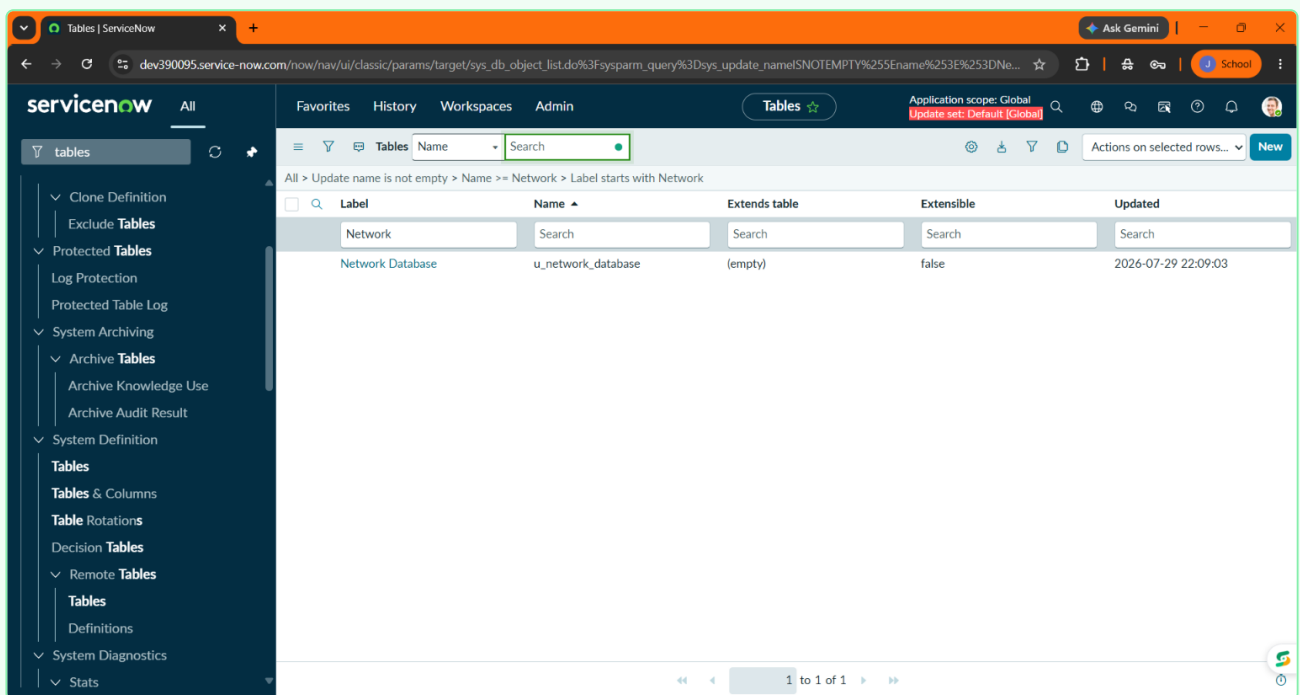

Figure 2. Network Database table configuration.

Activity 2 & 3: Creation of Fields and Defining Properties

We define the necessary fields required for the request records, applying the correct data types, max lengths, labels, and access controls for security.

2. Flow Designer Automation

Activity 1 & 2: Creation of Flow and Configuring Trigger

The flow automates the lifecycle of a request. It begins by triggering upon catalog submission and retrieving the necessary variables provided by the requester.

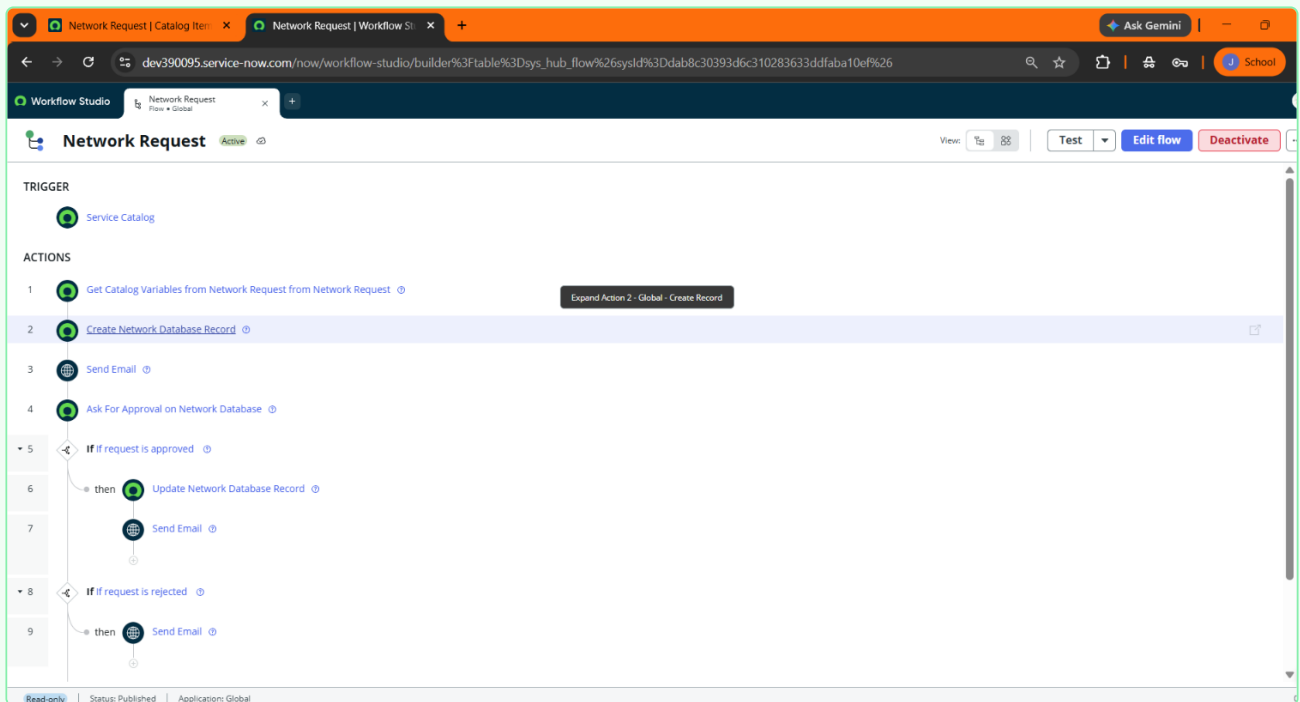

Figure 5. Network Request flow chart in Flow Designer.

Action Properties

Action: **Get Catalog Variables**

Action Inputs

* Submitted Request (Requested Item): Trigger: ... Requested Item ...

* Template Catalog Items and Variable Sets (Catalog Items and Variable Sets): Network Request

Catalog Variables

Available

No available values

Selected

on_the_behalf_of
email
phone_number
user_name
proof_of_document
request_for
is_this_a_new_connection_c
if_this_is_a_relocation_plea
please_provide_address_he
type_of_devices
provide_device_details_here

Note: If removing a variable from the 'Selected' list, it will be moved to 'Available' list only if the variable is from the selected Template Catalog Items and Variable Sets. Otherwise, the variable is removed from both 'Available' and 'Selected' lists.

Figure 6. Get Catalog Variables action.

Activity 3: Configuring Actions - Approval

An approval action is implemented followed by a decision condition to dynamically route the workflow based on whether the request is approved or rejected.

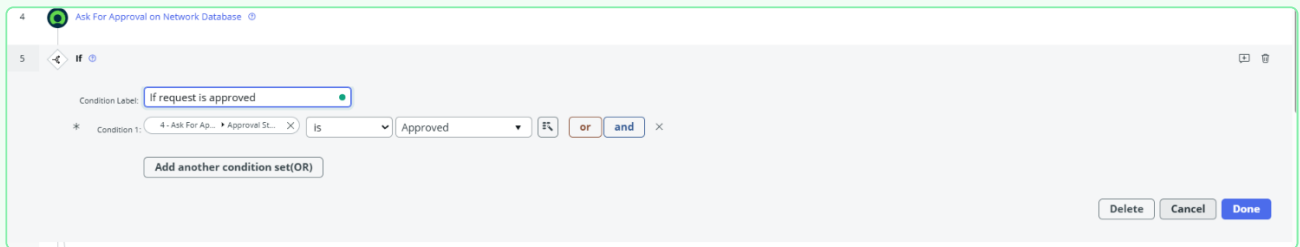

Figure 7. Ask for Approval action.

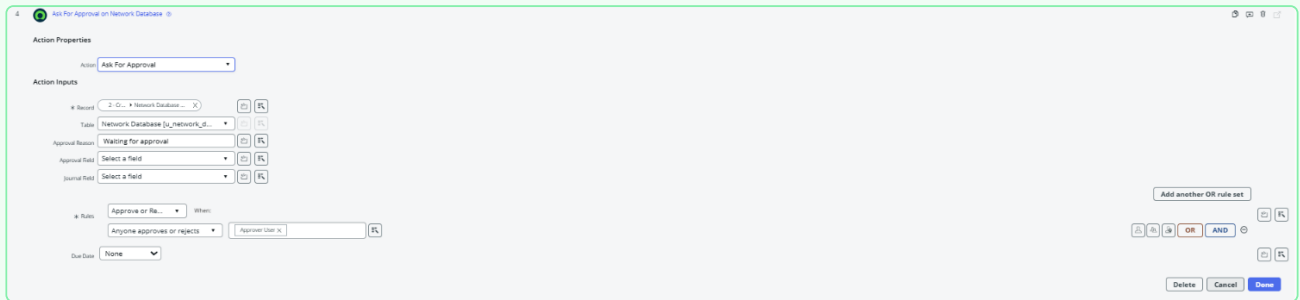

Figure 8. Approved decision condition.

Approved Request Path

For approved requests, the flow updates the current request status, creates a new entry in the Network Database using the catalog variables, and sends a confirmation email.

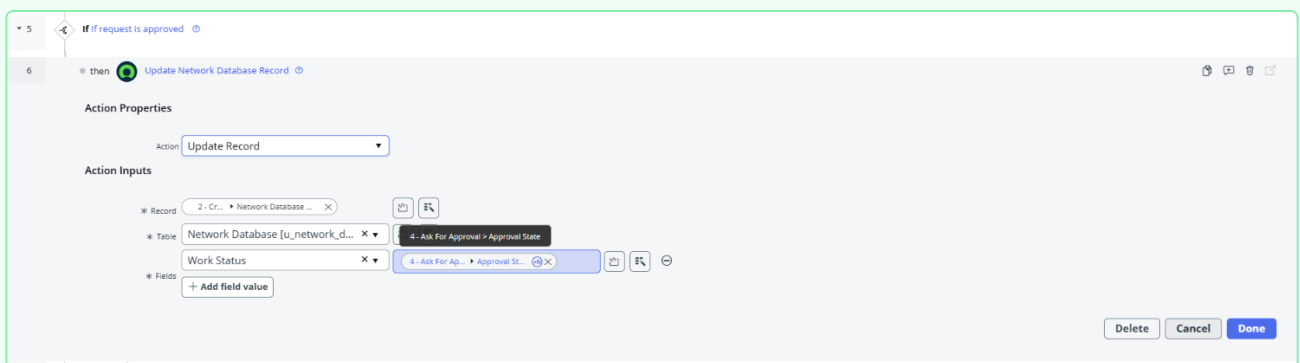

Figure 9. Approved-path Update Record action.

3. Catalog UI Policy and Client Script

To ensure data accuracy and guided form behaviour, Catalog UI Policies and a Client Script are applied. These dictate field visibility and mandatory requirements dynamically.

4. Service Catalog Configuration

Activity 1: Creation of Service Catalog Item

The Service Catalog item is created within Maintain Items, categorized correctly, and configured for user visibility.

Name	Short description	Active	Roles	Catalogs	Category	Price	Type	Updated
Network Request	Network Request Services	true		Service Catalog	Network Standard Changes	£0.00	Item	2026-07-30 06:21:51

Packaging and	Package and Ship Inter-	true		Service Catalog	Office	\$0.00	Item	2016-03-07

Figure 19. Maintain Items list.

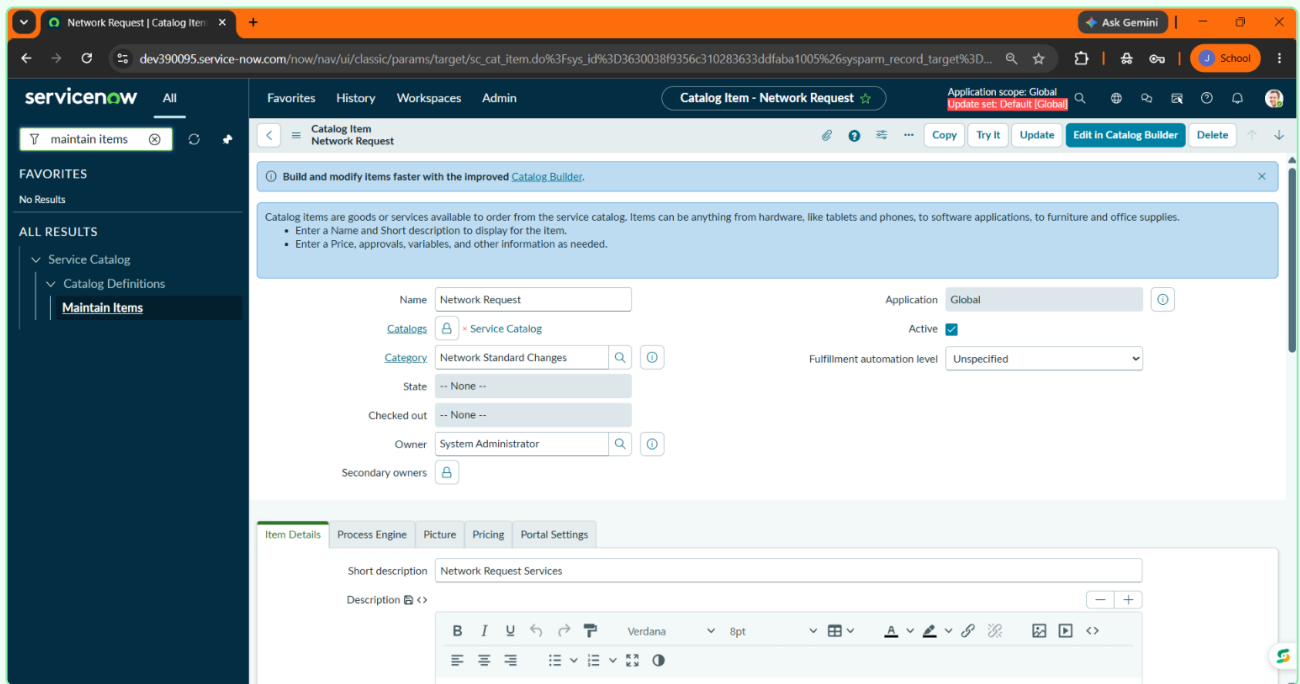

Figure 20. Network Request catalog item.

Activity 2 & 3: Variables Configuration and Types

The necessary questions are defined as catalog variables with specific types, ordering, and question text to gather the appropriate data from the user.

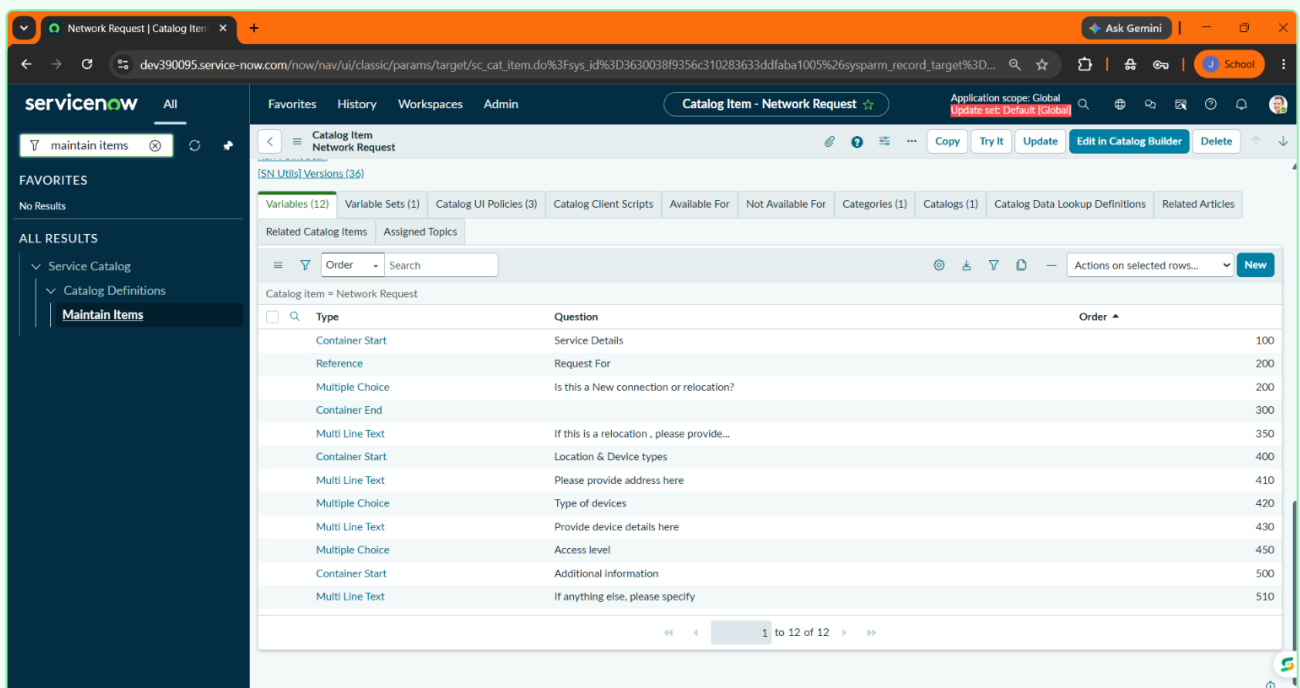

Figure 21. Catalog variables configured for Network Request.

Name	Type	Question	Order
on_the_behalf_of	Reference	on the behalf of	
email	Single Line Text	email	
phone_number	Single Line Text	phone number	
user_name	Single Line Text	user name	
proof_of_document	Attachment	proof of document	

Figure 22. Variable types and order.

Activity 4: Variable Set Configuration

A reusable variable set is created for consistency and attached to the main catalog item.

Variable set	Order
Request information	100

Figure 23. Network Request variable set.

Variable Set - Request Information

* Title: Request Information

* Internal name: request_information

Order: 100

Type: Single Row

Description:

Application: Global

Display title: ☒

Layout: 2 Columns Wide, one side, then the other

Figure 24. Variable set attached to the catalog item.

5. Catalog Submission & Validation

Activity 1 & 2: Search, Open, and Submit

Users can search for the catalog item, fill in the required fields guided by the UI policies, and submit their network request. A summary screen confirms the action.

The screenshot shows the 'Network Request' catalog item form in ServiceNow. The breadcrumb trail is: Home > Service Catalog > Standard Changes > Network Standard Changes > Network Request. The form is titled 'Network Request' with a subtitle 'Network Request Services'. It includes a 'Request information' section with fields for 'on the behalf of' (Rachel Larrison), 'email' (rachel.larrison@example.com), 'phone number' (9645789521), 'user name' (rachel.larrison), and 'proof of document' (with an 'Upload' button). Below this is a 'Request For' dropdown (Rachel Larrison) and a radio button selection for 'Is this a New connection or relocation?' (New is selected). A note at the bottom says '* Please provide address here' with a 'Guntur' input field. On the right, there's a 'Quantity' dropdown (1), 'Delivery Times: 2 Days', and buttons for 'Add to Cart', 'Save as Draft', and 'Order Now'.

Figure 25. Search results showing the Network Request catalog item.

The screenshot shows the search results for 'network request' in ServiceNow. The breadcrumb trail is: Home > Search. The search bar contains 'network request'. On the left, there are 'Sources' (All, Knowledge Bases, Catalogs) and 'FILTERS' (Knowledge Bases, Category, Author, Last modified, View Count, Catalogs). The main results area shows 'All results for "network request"'. The first result is 'Network Request' (Network Request Services). The second result is 'Request for Backup' (Backup system, data files or database). The third result is 'Apple iPhone 13' (Request for Apple iPhone 13, \$799.00). The fourth result is 'Apple iPhone 13 pro' (Request for Apple iPhone 13 pro, \$999.00 + \$45.00 Monthly). The URL at the bottom is: https://dev390095.service-now.com/so?id=sc_cat_item&sys_id=10d156ecc6112276003e090fc945083.
